

Lake Coeur D'Alene Official Report Unclassified

- **Date:** 19/11/2024
- **Case ID:** PIUC04
- **This report was conducted by:** Agent Kazlauskas

Introduction

According to “Haunted Places: Ghostly abodes, sacred sites, UFO landings and other supernatural locations” by Dennis William Hauck; Indians called “water mysteries” are said to inhabit this lake. “Unexplainable noises and the figure of a fish-woman have been reported near a large, pointed rock here. A mysterious wind sometimes churns up the lake, and a huge horned creature is said to lift boats out of the water.”

Idaho is home of several alleged cryptids; Bigfoot, lake monsters, even an alleged pterosaur.

Findings

Information on Known Aquatic Life

Tundra Swans: Males can grow up to 6.2 m -the average size being 4.7 m- and weigh about 1,600 kg. Females tend to be smaller, with an average size of 4 m and a maximum size of 5.1 m and weigh around 900 kg.

Black Crappie: The common length for black crappie is 27.5 cm (10.8 inches) and the maximum reported length for a black crappie is 49 cm (19.3 inches).

Brown Bullhead: The brown bullhead grows to be approximately 21 inches (53 cm) in length

Brown Trout: Brown trout can grow to considerable size, up to 20 pounds.

However, the average size is around 12 to 14 inches.

Bull Trout: Typically, adult Bull Trout are large (40-90 cm fork length).

Burbot: Average length of burbot by maturity is about 40 cm.

Chinook Salmon: Chinook are the largest Pacific salmon and can weigh over 100 lbs. But on average, Chinook hit the scales at about 30 lbs. They're long as well as heavy, in the range of 40 to 60 inches at maturity.

Coeur D'Alene Salamander: The Coeur d'Alene Salamander measures on average 10.9 cm long, tail included, and the females are generally larger than the males.

Kokanee: While size range of kokanee is often lake-specific and depends on many factors, in typical populations the kokanee grows to an average size of 23–30 centimetres (9–12 in) with an average weight of 0.45 kilograms (1 lb).

Largemouth Bass: Common length for largemouth bass is 40 cm (15.7 inches) with the longest recorded specimen being 97 cm (38.2 inches).

Largescale Sucker: Adults can reach a length of 24 in (61 cm) and 7 lb (3.2 kg) in

parts of their range.

Longnose Sucker: They are up to 64 cm (25 in) in total length.

Northern Pike: Pike can grow to a relatively large size: the average length is about 40–55 cm (16–22 in), with maximum recorded lengths of up to 150 cm (59 in) and published weights of 28.4 kg (63 lb).

Northern Pikeminnow: Northern pikeminnows can live at least 11 years, reaching up to 25 in (63 cm) in total length and 7.5 lb (3.4 kg) in weight.

Pumpkinseed: In Ontario waters Pumpkinseed can live 8-10 years and grow to a length of 25 cm (10") and to a weight of 11 ounces.

Rainbow Trout: They average about 20 to 30 inches long and around 8 pounds, but can grow as long as 4 feet and weigh up to 53 pounds.

Sculpin (Var. Species): There are about 300 species of sculpins, the largest of which grow about 60 cm (2 feet) long.

Smallmouth Bass: The length of smallmouth bass most commonly caught is between 12 and 16 in (30.5 cm to 40.6 cm). The maximum recorded length for a smallmouth bass is 27.2 in (69 cm).

Sturgeon: These large fish have been known to grow up to 6 metres long (the length of a small school bus) and over 600 kg.

Tench: Maximum size is 70 cm, though most specimens are much smaller.

Tiger Musky: The tiger muskie is renowned as a sport fish because it can reach sizes over 130 cm (50 in) long.

Whitecrappie: White crappie can live to a maximum of 8-10 years and reach lengths of 40 cm (16").

Whitefish: On average, the lake whitefish weighs only 4 pounds. They can grow to 31 inches (79 cm) and commonly reach 20 inches (51 cm).

Westslope Cutthroat Trout: The average size of these fish is 6 to 16 inches, depending on habitat, but they rarely exceed 18 inches in length.

Yellow Perch: The largest recorded yellow perch was 18 in (46 cm); 4 lb 3 oz (1.9 kg).

Recommendations

Overall, the recommendations that were made from this report were that of no conclusive evidence to support the theory of initial investigation.

Conclusion

To conclude this report, the findings show that the evidence presented were not conclusive enough to suggest that this was credible evidence nor was any evidence throughout the investigation presented.

- Grade Level – CG1
- Alert Level – AL1

This report was conducted by the authority of the International Bureau of Paranormal Investigation and Research.
